

PRODESIGN

INNOVATION

Prodesign is looking for a Mechanical Product Designer to join our innovative e-mobility research project. If you're passionate about EV technology and eager to contribute to the future of sustainable transportation, we want to hear from you!

MECHANICAL PRODUCT DESIGNER

Profile

- Bachelor's degree in mechanical or mechatronics Engineering
- Proficient in 3D modeling and CAD software (SolidWorks, or Autodesk Fusion)
- Passionate about EV technology and eco-friendly transportation solutions.
- Detail-oriented, with a meticulous approach to work
- Good communication skills (verbal and written)
- Ability to work under pressure with a customer-focused mindset

Duties and Responsibilities

- Research and development in general mechanical engineering system design and fabrication
- Design of mechanical engineering systems and products
- Build and test prototypes and other assemblies, ensuring they meet safety, performance, and regulatory standards
- Select appropriate materials based on performance, cost, and sustainability considerations.
- Monitor inventory of spare parts, supplies, and components

Mode of Application

A letter of application together with a detailed *Curriculum Vitae* and photocopies of qualifications, testimonials and equivalent qualifications (where applicable) should reach **Mr Vikram Bhujun, Director of Prodesign** by email admin@prodesign.mu, by **31 March 2025, at latest.**

Applications received after the closing date will not be considered.

Prodesign reserves the right:

- *to call for interview only the most appropriate and best qualified applicants*
- *not to make any appointment as a result of this advertisement*
